The Eighth International Workshop on Advanced Genomics Expansion of Genome Science

– Announcement –

The Human Genome Project has brought us the “genomics,” a new approach to biology that is characterized by comprehensive data acquisition, integration of informatics with biology, and the attitude to understand living organisms as molecular systems. The information and knowledge obtained from such genome-based research will decidedly affect the future development of various fields of life science and biotechnology, including medicine, pharmaceuticals, and agriculture. Genomics is especially contributing to personalized healthcare and research development of medicine, such as personalized medical treatment and drug target discovery. The breadth of information produced by next-generation sequencers, now, are contributing the expansion of genomics. And it is important to acknowledge the latest achievement and the new development of medical biology brought by next-generation sequencing technology.

The main theme of the 8th International Workshop on Advance Genomics planned in June 2009 is “Expansion of Genome Science.” It will cover various new frontiers of genomics including “Personal Genome,” “Cancer Genomics,” “Epigenome / Transcriptome,” “Chemogenomics,” “Metagenomics,” “Bioinformatics,” and “Next-generation Technology.” The organizing committee wishes to maintain the spirit of the preceding workshops by incorporating presentations on emerging technologies and encouraging related discussions.

The meeting is currently planned to have plenary lectures, symposia, and poster sessions, and we are expecting as many as 500 attendants. The workshop is organized by the 164th Committee of Japan Society for the Promotion of Science (JSPS), and is supported by Japan Bioindustry Association, and the Federation of Pharmaceutical Manufacturers' Associations of Japan.

第8回 国際ゲノム会議「急速に進展するゲノム科学」

- 開催趣意書 -

ゲノムプロジェクトは、大量の情報取得とその解析により、様々な生命現象の実体にせまろうとする新しい研究パラダイム、ゲノム科学 (Genomics) を生み出しました。今や、ゲノム科学は、応用分野でも大きな影響を与えつつあり、特に創薬ターゲットの発見や個々の患者に合った医療の提供など、オーダーメイド医療の実現や医薬品の研究開発にも大きく貢献してきています。これまでの蓄積に加え、新たに登場したシーケンサーなどの新技術が、今までにはなかった治療情報をもたらす、新たな拡大が始まっています。

これを受けて、今まさに急激に発展しつつあるゲノム科学の最新の成果を知り、超並列型シーケンサーなどの新技術がもたらす、医学・生物学の新たな展開を展望することを目的とし、「急速に進展するゲノム科学」をテーマに、第8回「国際ゲノム会議」を2009年6月16,17,18日に学術総合センターで開催する運びとなりました。

ゲノム科学は今や、ゲノム研究者に限られたものではなく、医学、生物学、物理、化学、工学、情報学の幅広い分野に関わっており、また、医学・生物学関係の幅広い企業の方にも、無視し得ないものになっています。本シンポジウムに幅広い分野の方がたのご参加を期待する次第です。
